

# CENTURY GROUP INC. ATTENDS THE 17<sup>th</sup> ANNUAL CANADIAN ENVIRONMENTAL CONFERENCE & TRADESHOW

[Century Group Inc.](#) attended the CANECT, Canadian Environmental Conference & Tradeshow, displaying their full line of [railroad spill containment systems](#) used in railroad locomotive fueling racks and railroad tank car transloading racks. The 17<sup>th</sup> Annual CANECT meeting and tradeshow was held at the Metro Toronto Convention Center April 20<sup>th</sup> and 21<sup>st</sup>. Environmental engineers, federal and provincial government officers, along with environmental managers and coordinators from Canada and the United States were present at CANECT 2009.

Century Group's Rob Greenside commented "Secondary containment at railroad tank car loading racks and locomotive fueling facilities are at the top of everyone's priority list and was of great interest to many of those individuals visiting the Century Group booth. It was very beneficial to all parties to be able to discuss spill and emergency response requirements at railroad tank car loading racks and other railroad spill containment applications."

Century Group Inc's display booth featured information on Century's complete line of [HDPE spill containment pans](#) and portable truck spill containment berms. For more information on Century's [railroad spill containment pans](#) and portable truck spill containment berms contact [railroad@centurygrp.com](mailto:railroad@centurygrp.com) or call 1-800-527-5232, Ext. 118.
