

## Century Group Manufactures Custom Concrete Crossings for Port Facility

Century Group Inc. manufactured and delivered custom precast concrete crossing panels in a turnout for a major port facility. Century Group's technical team mobilized to the project site to obtain "As Built" measurements in order to fabricate custom panels to be installed in the railroad track turnout.

The project also featured custom steel wedge panels fabricated to fit around the railroad switch points in order to accommodate the heavy truck, tractor, and vehicular traffic in the major port facility.

For more information on Century Groups Inc.'s railroad grade crossing panels which include customized panels for curves, turnouts, and pedestrian crossing applications email the Century Group Railroad Products Division or call 1-800-527-5232, Ext. 118.
