

Precast Concrete Golf Tee Markers Provided By Century Group For Resort Golf Course

Recently Century Group Inc. designed and manufactured custom precast concrete golf tee markers for L'Auberge du Lac Casino Resort located in Lake Charles, Louisiana.

The concrete tee markers were designed and manufactured to resemble a cypress tree stump which are prevalent in coastal Louisiana and blended in with the aquatic and natural vegetation around the eight lakes on the L'Auberge golf course. The golf tee markers also featured a custom color to closely match natural cypress stumps with the outside perimeter resembling the bark of cypress trees. The tee markers featured engraved text providing hole numbers, pars and yardage for the 18 holes on the golf course. Other specialized tee markers were engraved with information identifying other golf course amenities such as cart paths, etc....

Century Group's Rob Robinson commented, "It was a privilege to be able to work with L'Auberge du Lac in developing a custom tee marker that is perfectly suited for their golf course. We are also proud of our design and manufacturing team for the development and manufacture of the concrete tee markers that featured such characteristics that blended in with the natural south Louisiana aquatic atmosphere."

For more information on Century Group's precast concrete golf course tee markers and other amenities, contact concrete@centurygrp.com or call 800-527-5232, Ext. 165.
