

Century Group Manufactures Precast Concrete Railroad Milepost Markers

Century Group Inc. manufactured its precast concrete railroad milepost markers to the Hudson Bergen Railroad in Jersey City, New Jersey. The concrete milepost markers featured a buff color with a custom cast number on three sides of the marker. The railroad milepost markers were manufactured using 5000 p.s.i. steel reinforced concrete.

Century Group's Johnny Bergeron commented, "We are pleased to be able to provide our railroad clients with quality railroad milepost markers which are visually appealing, maintenance free and will last a lifetime."

Century Group Inc. is a leading provider of [precast concrete railroad right-of-way and milepost markers](#) to Class I and shortline railroads.
