

Century Group Inc. Manufactures Precast Concrete Pipe Weights

Century Group Inc. completed production of an order for precast concrete pipe weights for a wastewater treatment facility in south Louisiana. The project called for the concrete pipe weights to be two pieces connecting together with ½” stainless steel threaded rods. The concrete pipe weights were designed to hold stable a 12” HDPE (high-density polyethylene) wastewater pipe. Each pipe weight was produced using 5000 p.s.i. concrete and reinforced with American Grade 60 reinforcement.

Century Group Inc. is the leading producer of precast concrete pipeline weights and pipe supports for chemical, petroleum, gas, water, and wastewater pipelines being installed across rivers, lakes, coastal marshes, and estuaries. For more information on Century Groups Inc.’s precast concrete pipe weights, pipeline sleepers/supports, pipeline ditch shields, and other precast concrete products email the Century Group Precast Products Division or call 1-800-527-5232, Ext. 165.

Precast Concrete Bolt-On Pipe Weight for 12” HDPE Wastewater Pipeline
