

Century Group Manufactures Precast Concrete Pipeline Shields for Mississippi Project

Century Group Inc. manufactured and delivered precast concrete pipeline ditch shields for use on a new pipeline construction project. The new pipeline will be installed starting in Hattiesburg, Mississippi to Baker, Louisiana.

Century's precast pipeline ditch shields are installed where pipelines traverse ditches to serve as a liner providing protection from accidental excavation during highway construction and maintenance operations.

Century Group Inc is a major supplier of precast concrete pipeline ditch shields, pipeline weights and pipeline sleepers /

supports to the pipeline and petrochemical industry across the U. S.

Precast concrete pipeline ditch liners being loaded for a pipeline project.

Century's precast concrete pipeline ditch shields delivered to a pipeline project in Hattiesburg, Mississippi.

Century Group Supplies Precast Concrete Pipe Supports

Century Group Inc. manufactured and supplied precast concrete pipe supports to Shaw Environmental. The pipe supports were manufactured with 6,000 psi concrete, steel reinforcement and featured embedded threaded

bolts used to attach the pipe slide pads to the supports. The pipe supports / sleepers also had recessed lifting units to assist with handling of the structures which weighted approximately 2,400 lbs. The concrete pipe supports were designed to hold three 4" diameter fuel lines.

natural gas pipeline companies across the U. S.
