

Century Group Completes Custom Concrete Turnout Grade Crossing

Century Group Inc. Railroad Products Division completed custom concrete grade crossing panels design and manufacture for a turnout application within a major port facility. Century Group custom manufactured closure and curve crossing panels that were utilized on steel crossties. Century Group worked closely with the port facility construction personnel and the consulting engineering firm to develop a design and product that would meet their specific needs and requirements. For more information on precast concrete railroad products to fit your project needs contact railroad@centurygrp.com or call 1-800-527-5232, Ext. 118 or visit www.centurygrp.com.

Century's Custom Concrete Railroad Grade Crossing Panels Manufactured for a Railroad Turnout.
