

## Century Group Inc. Delivers Precast Concrete Security Bollards to Petrochemical Facility

Century Group Inc. designed, manufactured and delivered precast concrete security bollards to a petrochemical refinery. The self standing security bollards were used to separate construction lay down yard areas during project turnarounds.

The high-strength precast concrete bollards featured cast-in inserts to allow for cables to be run through each bollard to help block off entry into secure areas. The security bollards were coated with a textured coating in a high visibility safety yellow. Each

concrete bollard had a recessed lifting unit in the top of each structure for safe and easy handling.

For more information on Century Groups Inc.'s precast concrete security bollards, safety barriers and other precast concrete products click on the link to email the Century Group Precast Products Division or call 1-800-527-5232, Ext. 165.
