

Century Group

Provides Custom Concrete Stair Treads For North Carolina Country Club

Continuing its role as a leading supplier of precast concrete stair treads, Century Group Inc. recently delivered custom colored open riser stair treads for the Prestonwood Country Club in Cary, North Carolina. The custom stair treads were manufactured to replace cast-in-place stair treads and to match stair treads provided by Century Group in 2004 on other onsite stairways at the country club.

The concrete stair treads were custom designed to fit spiral stair cases that lead into the main club house. The stair treads also featured a custom caramel brown color. The stair treads were purchased and installed by Precision Welding Services who have manufactured stairways for over 30 years in the Raleigh, North Carolina area. Precision Welding has been involved in a broad array of projects including commercial, residential, governmental, recreational and multi-family housing projects.

Century Group Inc. Division manager, David Davis, commented "It was a privilege to be able to work with Precision Welding on the Prestonwood Country Club project. All parties worked closely together to put together a first class project that all can be proud." For more information on Century Groups Inc.'s precast concrete stair treads and full line of precast concrete steps and handrails contact steps@centurygrp.com, call 1-800-527-5232, Ext. 110 or visit www.centurygrp.com.
