

Century Group Inc. Attains NPCA Certified Plant Distinction

(Sulphur) 11/23/2010 - Century Group Inc., located in Sulphur, Louisiana is pleased to announce it has been awarded status as a National Precast Concrete Association (NPCA) Certified Plant. The designation recognizes Century Group Inc. as a precast concrete manufacturing plant operating at the highest standards of production and quality control.

NPCA established its national Plant Certification Program in 1987 to ensure a consistent industry benchmark and a high degree of excellence among precast operations. The program involves a comprehensive review of all aspects of a plant's manufacturing processes. To achieve certification, participants must pass an initial inspection. Plants then maintain certification by passing periodic, unannounced on-site inspections conducted by an independent engineering firm.

According to Ty E. Gable, NPCA president, Century Group Inc. has proven its commitment to producing high-quality precast products by attaining certification. By specifying NPCA certification and purchasing products from certified plants, engineers, architects and contractors are assured they are receiving products that come from an organization dedicated to the highest level of quality throughout the manufacturing process.

Century Group is a leading manufacturer of precast concrete steps, stair treads, and concrete highway railroad grade crossings in the U. S. For more information about Century Groups Inc. and their full line of precast concrete products, email the Century Group Precast Products Division, the Century Group Railroad Products Division or the Century Group Steps® Division or call 1-800-527-5232.
