

## Century Group Provides Concrete Stair Treads for Winthrop University Project

Century Group Inc. had the privilege of being a part of the construction of the Anthony J. and Gale N. DiGiorgio Campus Center located at Winthrop University in Rock Hill, South Carolina. Century Group provided its concrete open riser stair treads and concrete stairway landings to Lietner Construction Company Inc. of Rock Hill who performed the installation. Century Group provided custom manufactured precast concrete open riser stair treads and stairway landings on the project. The 67½" wide concrete stair treads were cast with standard gray concrete with the surface finely ground exposing the specified tan color aggregate.

Century Group's National Manufacturing Manager, Rob Robinson, stated, "It was a pleasure to work with Leitner Construction Company on the DiGiorgio Campus Center Project. The unique finish custom design of the stair treads and stairway landings were a challenge but we all worked as a team with Leitner Construction to get the stair treads produced and installed in a world-class facility."

For more information on Century precast concrete stair treads, click on the link to email the Century Group Steps® Division or call 1-800-527-5232, Ext. 110.
