Precast Concrete OSHA STAR Worksite Sign

The sign in front of corporate offices, hotels, restaurants, malls, apartments, parks, residential developments, churches, schools, and governmental buildings is the first image that is projected to clients and visitors. With a Century precast concrete sign you can be assured that your sign will convey an image of class, success and permanence. Century Group Inc. regularly partners with architects, engineers, graphic designers and landscape architects to design and develop custom precast concrete signs to project the vision, image and to perfectly compliment the architectural theme of their projects.

EXPERIENCE

Century Group Inc. has been involved in precast concrete manufacturing for over 60 years and provides a variety of precast concrete products across North America. With a wealth of experience and knowledge in the manufacture of custom precast concrete signs, our technical design staff can assist in the development of a precast concrete sign that will enhance your project by complimenting its surroundings and project the true permanence of precast concrete.

CCA Louisiana Precast Concrete Sign

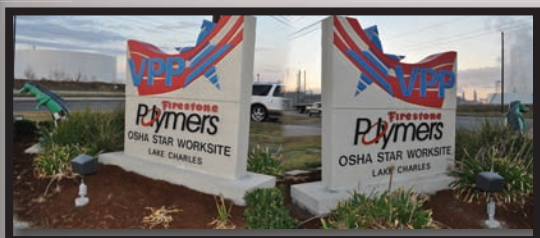

VERSATILE DESIGN

Century Group Inc. offers several standard concrete sign designs but also specializes in custom manufacturing precast concrete signs to meet the exact needs of our customers. Century's precast concrete signs range from small pedestal entrance/exit signs to large corporate signs. Century concrete sign designs vary from freestanding structures, those cast into poured-in-place foundations, to those which are set into brick walls and fences.

Precast Concrete Sign for Medical Office

Whether your sign specifications call for single or double-faced, square, rectangular, oval or multi-dimensional, Century Group Inc. is up to the task to manufacture the perfect sign to meet your project needs.

DIVERSE GRAPHICS

One of the most important aspects of designing and manufacturing a precast concrete sign is graphics. Century Group Inc. offers great diversity when it comes to casting a broad array of text and logos into concrete signs. If your logo/text can be transferred via computer in AutoCAD or a jpeg, Century Group Inc. can cast it into a concrete sign where it will last for decades if not centuries. Your logos, graphics and text can be cast into the concrete at different layers to project a multi-dimensional look to perfectly compliment the image and architectural style desired. Century Group Inc. offers a diverse

line of materials which can be used to accentuate logos, text, and other graphics. Whether it is brushed stainless steel, brass, bronze or state-of-the-art durable polymer letters and logos, Century Group can incorporate these materials into your precast concrete sign ensuring that design, texture, geometry, and color meet your project requirements.

Precast Concrete Sign for Water Park

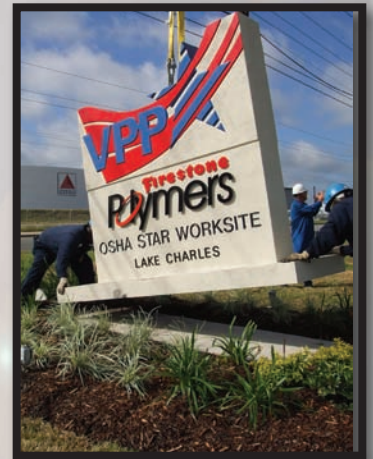

QUALITY

Your Century precast concrete sign will be manufactured in one of our NPCA (National Precast Concrete Association) certified manufacturing facilities by our highly skilled and experienced staff.

All Century concrete signs are manufactured using 4,000 p.s.i. concrete with American Grade 60 or 72 reinforcement depending upon the application and design. On some occasions fiber reinforcement is utilized when casting ultra thin concrete structures.

All Century Quality Control Inspectors and are Supervisors are A.C.I. (American Concrete Institute) Grade Certified Technicians to insure that your precast concrete sign is manufactured using only the highest quality materials and procedures.

DURABLE

Manufactured of high-strength steel reinforced 4,000 p.s.i. concrete, Century's concrete signs are resistant to the harshest of climates and virtually indestructible. With the durability of high-strength concrete the Century signs are not susceptible to vandalism which is a problem with fiberglass and lightweight metal signs. The Century concrete signs do not warp, corrode or rot. The Century concrete signs are immune to termite damage. With the use of high-quality cementitious coatings the Century concrete signs do not fade, peel or chip. If ever defaced with spray paint or other substances, Century concrete signs can be easily repaired at a very low cost. Virtually maintenance free, the Century precast concrete signs are the obvious choice when making your decision regarding signage. We are very proud that our concrete signs are now certified hurricane resistant! The majority of the signs depicted on this site rode out Hurricane Rita in southwest Louisiana in 2005. We are proud to say that every one of the signs are virtually in the same condition as the day they were installed (Hurricane Survivor Sign Flyer) "The proof is in the pudding", our signs held up to 140 mph. sustained wind gusts! So if you are looking for the most durable sign available the answer is a Century precast concrete sign.

MULTIPLE COLORS & FINISHES

Century Group Inc. recognizes the significance of developing the right color scheme and texture of a sign. Both items make the difference in whether your sign gets noticed, demands attention, compliments the surrounding architecture and landscape and most important of all projects the image and message desired.

Precast Concrete Sign for Financial Institution

Century concrete signs are cast in gray concrete along with custom colors such as buff, white and other earth tone shades.

Many of the custom concrete signs manufactured by Century Group are cast in standard gray and then coated with cementitious coatings in a wide variety of colors and varying degrees of texture. Some projects call for a finish that simulates stone, brick or granite type finishes.

Century Group Inc. also incorporates form liners during manufacturing to cast fractured rib, brick patterns and other designs.

DESIGN

Century Group Inc. commonly works with architects, engineers, advertising executives and property owners to develop project drawings that include general design, graphics, foundation and installation procedures.

Concrete Sign for Recreational Complex

PRICING

Century Group Inc. can price a concrete sign several different ways. If you have drawings and specifications you can email to concrete@centurygrp.com or fax them to us at 1-800-887-2153. Once we have all the information required we can normally submit a written quotation within 3 to 5 working days.

DELIVERY/INSTALLTION

All standard precast concrete signs designed by Century Group will have written installation instructions. Many of Century's signs are freestanding and very easy to install on a stable foundation.

Some Century signs are constructed with a footing that includes block outs. When the sign is installed on a poured-in-place foundation it is anchored by grouting in the block outs which have dowel rods or reinforcement members connecting the two structures. Century signs are manufactured using engineered lifting units that have a 3:1 lifting ratio minimum. Lifting slings and units are engineered for handling the signs to ensure a safe installation.

Concrete Sign for Church

Century Group Inc. also manufactures a variety of other architectural precast concrete products that can compliment or be an accessory to your Century concrete sign. The list includes fence caps, column caps, bases, a variety of precast columns, balustrades and many other precast concrete products.

With our experience and reputation we are the obvious choice when selecting a sign for your next project. Choose a Century concrete sign that is ageless, durable, and projects the first class image that you desire. Whatever type sign your project demands Century Group will partner with your team and together we'll create the perfect concrete sign that has durability, class and convey the message your desire.
